

Nro panel	ID Trabajo	Título	Presentador	Mención
	Hematología			
	P1	Posters		
	Fecha y hora:	20/11/2024 16:10-17:10 h		
	Coordinadores	Ana Claudia Glembotsky, Paola Roxana Lev, Romina Eugenia Maltaneri		
176	159	SYNTHESIS AND METABOLISM OF SEX HORMONES IN LEUKOCYTES OF WOMEN WITH SYNDROME ANTI PHOSPHOLIPID	Paula Julieta Cepeda (1 Instituto de la Salud)	Si
178	21	EFFECT OF Ligaria cuneifolia INFUSION (?Argentine mistletoe?) ON PLASMATIC CHOLESTEROL, ERYTHROCYTE MEMBRANE CHOLESTEROL AND THE BLOOD FLUIDITY MEASURED AT HIGH FLOW RATE IN DYSLIPIDEMIC PATIENTS.	Martín Omar Perez (Cátedra de Bioquímica)	No
180	45	ALTERED ANDROGENIC PATHWAY IN <i>in vitro</i> TESTOSTERONE STIMULATED PERIPHERAL BLOOD MONONUCLEAR CELLS (PBMC) OF PATIENTS WITH CHRONIC LYMPHOCYTIC LEUKEMIA	Luisa Gaydou (Departamento de Biología)	No
182	55	STUDY OF LEUKEMIC STEM CELLS (LSCS) IN CHRONIC MYELOID LEUKEMIA (CML) PATIENTS IN TREATMENT-FREE REMISSION (TFR)	Maria Jazmin Toloza (Instituto de la Salud)	No
184	266	VALIDATION OF NOVEL HUB GENES EXPRESSION IN PATIENTS WITH MYELODYSPLASTIC SYNDROME AND SF3B1 MUTATIONS	Marco Vinicio Lincango Yupanki (Instituto de la Salud)	No
186	40	Escherichia coli alpha hemolysin increases red blood cell sequestration in a microfluidic device mimicking the spleen? s red pulp	Nicolás Andrés Saffioti (Instituto de la Salud)	No
188	63	Expression of RelB-controlled genes identify Hodgkin and Reed-Sternberg (HRS) cells in a single transcriptome of a classic Hodgkin lymphoma patient and unveils macrophages as the main partner in HRS-immune cells communication within the microenvironment.	Guillermo Blanco (Hospital de Clínicas)	No
190	307	HEMOLYTIC DISEASE OF THE FETUS AND NEWBORN DUE TO ANTI-D IN A PREGNANT WOMAN WITH RHD DBT VARIANT	Carlos Daniel Alberto De La Vega (Instituto de la Salud)	No
